0800 500 3076

*subject to eligibility, funding, and maximum grant allowance.

Gloucester City Council
Transforming Your City

Grant funding of up to £4,500 per property is available to eligible clients. The scheme helps those who do not currently have a central heating system, and those who have storage heaters which heat up to 50% of the rooms**. Funding is subject to eligibility and availability.

To find out if you're eligible, call our advisors on the number below. The scheme is open to those who own or privately rent their homes and will need to meet certain criteria. Eligibility will be based on your income, housing costs and fuel bills, or the benefits you are in receipt of. Please have these details available when you call, or if you are unsure our advisors will be happy to send out further information on the details we need.

Free home energy advice visits and grants for cavity wall and loft insulation are also available, subject to eligibility and funding availability. Insulation grants are also subject to a survey.

For more information or for general energy efficiency advice, please contact our friendly team of advisors.
