

APPENDIX B

Goad Town Centre Reports

Gloucester

GETTING THE MOST FROM YOUR GOAD CENTRE REPORT

Each shopping centre has its own unique mix of multiple outlets, independent shops, convenience and comparison stores, food outlets and vacant premises.

Understanding the retail composition of a centre and its effect on local consumers is crucial to the success of any business. By studying the information in the report, you will be able to examine site quality, evaluate threats and opportunities, and assess the vitality and viability of the centre. However, you will only achieve this if you are aware of the various implications of the data that you see. This guide is designed to help you interpret the information you see on the Goad Centre Report.

1. The Local Area

The map in the top left-hand corner of your report locates other local Goad centres. When evaluating the quality of a site, it is often beneficial to compare it with other local shopping centres. Goad Centre Reports are available for any of the highlighted centres.

2. The Indexing System

A simple indexing system appears throughout the report. This illustrates the difference between a percentage figure for the centre and the UK average. An index of 100 represents an exact match, anything less than 100 indicates a below average count for the centre, and a figure over 100 represents an above average count.

For example, if restaurants accounted for 10% of a centre's outlets and the UK average was also 10%, the index would be 100. If however, the UK average was 8%, the index would be 125.

The index is an effective gap analysis tool and can be used to identify areas that are under and over represented within a centre. A retail category that is heavily under represented could indicate poor local demand. On the other hand, it could show that there is an untapped market waiting to be serviced. Either way, it provides a strong indication that the site will need to be examined further.

3. Floor Space

The floor space figures shown on the report are derived from the relevant Goad Plan, but only show the footprint floorspace, and the site area without the building lines. They should not therefore be read as a definitive report of floor space, but do provide a useful means of comparison between centres, as all outlets are measured in a consistent manner.

4. Vacant Outlets

Comparing the number of vacant outlets with the UK average provides a useful insight into the current economic status of a centre. For example, a high index generally represents under-development or decay, while a low index shows a strong retail presence.

5. Multiple Outlets/Key Attractors

A multiple retailer is defined as being part of a network of nine or more outlets. The presence of multiple outlets can greatly enhance the appeal of

a centre to local consumers: The strong branding and comprehensive product mix of retailers such as Marks & Spencer, Boots and HMV is often sufficient in itself to attract consumers to a centre. Approximately 27 national multiples have been identified as key attractors, (i.e. those retailers most likely to improve the consumer appeal of a centre). The presence of multiple outlets and key attractors can have a significant impact on neighbouring outlets: While other retailers will undoubtedly benefit from increased pedestrian traffic, (and therefore increased sales opportunities), multiples provide fierce competition for rivals in their retail categories.

Also available from Experian:

The Goad Category Reports

Category reports allow you to compare retail centres and breakdown the retail types to allow you to undertake detailed study.

The report allows you to examine site quality, evaluate threats and opportunities and assess the vitality and viability for all the retail centres within your town centres. Provides a comprehensive breakdown of floor space and outlet count for all individual trade types in the Convenience, Comparison, Retail Service, Leisure / Financial / Business Services and Vacancy sectors.

Using a number of simple indicators, Goad Category reports look at the retail composition and its impact on local consumers. A simple indexing system acts as an effective gap analysis tool, identifying retail categories that are under or over represented within a shopping area. This in turn can indicate an untapped market or poor consumer demand for particular products or services in a retail area.

The Goad Catchment Profile

This measures the extent of the local consumer base, in relation to a shopping centre. It also helps you to recognise the individual groups that make-up a local population, using Mosaic, the world's leading geo-demographic classification system.

Mosaic classifies individuals using census, financial, housing and retail data. Combining this with the profile's information on local household composition and age structure enables you to understand the varied lifestyles and behaviours of individual customers. You can then tailor your products, services and communications to suit local markets, build one-to-one customer relations and generate greater brand loyalty.

Retail Planner

Retail Planner delivers clear, comprehensive, up-to-date expenditure and demographic information to improve your planning-related decisions:

- Estimate future spending on retail goods and leisure services
- Identify changes in the efficiency of retail floor space
- Explain past trends and forecast business turnover potential
- Demonstrate retail planning knowledge to your clients

Goad Network

A Goad plan provides a bird's-eye view of a retail centre, illustrating the fascia name, retail category, floor space and exact location of all retail outlets and vacant premises. Key location factors such as pedestrian zones, road crossings, bus stops and car parks are also featured, allowing

you to instantly assess the site quality of existing or prospective store locations in an easy to use Goad Network internet service.

Access the service at

<http://www.goadnetwork.co.uk>

Historic Plans

Historic Goad plans dating back to 1968 are available for you to compare retail mix over a period of time and are ideal for supporting planning and consultancy services. Plans surveyed after 1999 are also available in a digital format and can be uploaded to your Goad Network service, allowing you to make online comparisons.

Bespoke Goads

Our Cartography team can produce paper or PDF copies of Goad plans that identify Use Class, floor space variations and can display client data in a variety of mediums. Gap Analysis of multiple Goad plans can be presented in a clear visual manner, which allows clients to run comparisons of neighbouring locations

Demographics Online

DOL is the one stop shop for organisations requiring a quick, clear and actionable source of on-line demographic data that helps clients analyse existing and potential retail locations. Our DOL service provides clients with access to UK census data, and award winning market segmentation data in simple, easy to read, local area information reports specified by you. The report packs include sections on population statistics, age analysis, employment data and many others. The interactive mapping section allows you to map drive-times around your locations and view your customers. Our off the shelf reports include maps, charts and tables to help your understanding; or tailor the data to meet your own requirements. Subscription is for a year and usage is unlimited!

Shop Point

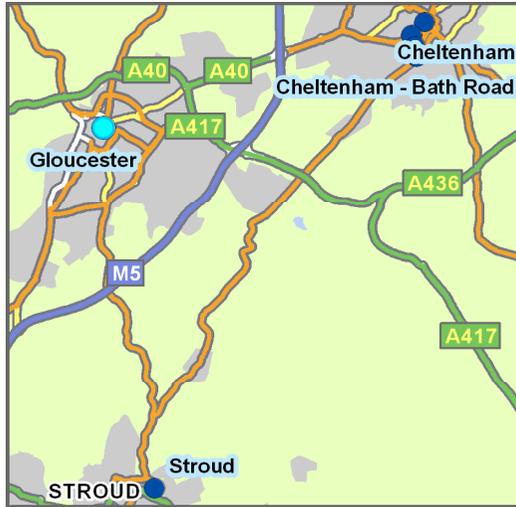

Shop Point is a comprehensive database covering all retail locations in the UK and the main towns and cities in the Republic of Ireland. It combines data from Experian's Goad Retail Database, Experian's National Business Database, Catalyst and other researched sources, for example, the Internet, direct contact with retailers, and industry publications. The data set includes over 30 pieces of retail information including: Fascia, address, floor space and co-ordinates.

Shop Point is a comprehensive database covering all retail locations in the UK and the main towns and cities in the Republic of Ireland. It combines data from Experian's Goad Retail Database, Experian's National Business Database, Catalyst and other researched sources, for example, the Internet, direct contact with retailers, and industry publications. The data set includes over 30 pieces of retail information including: Fascia, address, floor space and co-ordinates.

For further details on these products or if you have any queries regarding your Goad Centre Report, please contact Experian on:

Tel: 0845 601 6011
