1. Executive Summary

Gloucester City Council has monitored the progress of approved new housing planning applications and allocations since 1989. This report covers the monitoring period 1 April 2011- 31 March 2012. The report records the following information:

- The status of all sites subject to planning permission for new housing or the loss of housing within the monitoring period.
- The number of new dwellings that have been completed within the monitoring period.
- An indication of future housing supply based on firm commitments (sites with planning permission that have not been completed) and also using draft allocations contained within the Council's emerging Local Development Framework.
- The number of dwellings that have been lost within the city as a consequence of conversion to other uses or the subdivision of existing dwellings.
- A summary of the city's housing delivery against the Council's interim housing requirements contained within the Developing the Preferred Option Joint Core Strategy (December 2011), Gloucestershire Structure Plan (third alteration) and Draft Regional Spatial Strategy.

Summary of Findings

Between 1 April 2011 and 31 March 2012 the gross completion figure for new dwellings in Gloucester was 596. In the same period 4 dwellings were lost to other uses or as a consequence of the subdivision of existing dwellings. The net completion figure for new dwellings in Gloucester is therefore **592 dwellings**.

The highest rates of completion were experienced in Quedgeley Fieldcourt Ward (36.24%), followed by Westgate Ward (31.2%).

Of the gross completions, 404 dwellings were completed on brownfield land (67.8%) and 192 dwellings were completed on green field land (32.2%).

The average density of new build completed dwellings was 64.8 dwellings per hectare, again exceeding national and local targets.

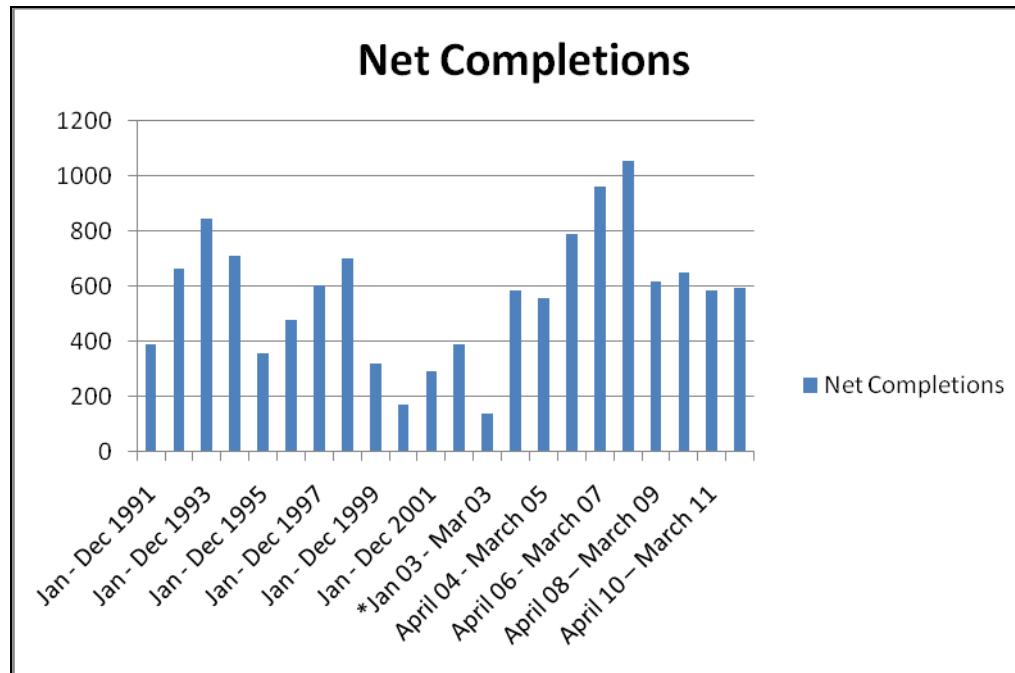

Between mid 1991 to 31 March 2012, an additional 12,451 dwellings (net) have been provided within the city. The Structure Plan requirement for Gloucester up to 2011 was 10,250 dwellings. Therefore, Gloucester has clearly exceeded the previous Structure Plan requirement.

The draft RSS covered a 20-year period between 2006 and 2026. During this time, Gloucester was required to provide 11,500 dwellings. Between 2006 and 2012, 4,460 dwellings have been completed in the city. An additional 7040 dwellings would be required within the City by 2026 to achieve the draft RSS requirement.

The Developing the Preferred Option Joint Core Strategy consultation (December 2011) identified that the Gloucester City administrative area could provide 6,500 new dwellings between 2011 and 2031 to contribute to housing need within the Joint Core Strategy area. This requirement equates to an annual delivery of 325 new homes per annum over the twenty year period. In delivering 592 new homes in the 2011/2012 period the City has exceeded the annual delivery requirement in the present monitoring year. A total of 5,908 new dwellings therefore remain to be delivered within the City before 2031.

Appendix 2 - Site Status 2010/11

The following section provides information on all sites in Gloucester with planning permission as of 1 April 2011. For ease of use, the sites have been split according to the ward within which they are located. The sites have also been split between large and small sites (large = 10 or more dwellings; small = 9 or less dwellings). A summary of gross completions by ward is provided at Appendix 1.
